

Your Physician: James Thacker M.D.

Clinic Pin: 160518

Welcome to the Care Continuity Program

Care Continuity Program

Your doctor cares about your treatment, that's why you're signed up!

You were enrolled in the Care Continuity Program by your healthcare provider because you are being treated for a condition that may require the use of a controlled substance. Controlled substance therapy comes with certain risks that can negatively impact your treatment and screening for those risks can be challenging. The purpose of this program is to assist the doctor with identifying risk in order to find the very best treatment for you.

Here's what you need to do next...

- Step 1:** Through the use of an internet - enabled device, go to the web address www.clarityhealth.care/enroll
- Step 2:** Click on 'Patient Enrollment' at the top of the page, then use your Clinic Pin to enroll: 160518
- Step 3:** After you've enrolled, go to www.clarityhealth.care/suremed and click 'Patient Login'
- Step 4:** Log in with your Clinic Pin and complete the Care Continuity evaluations on each page
- Step 5:** When you're done, use your mouse or touchscreen to click the 'Submit' button to complete your evaluation

For patients who don't have a computer at home, you have a few other options to complete your monthly evaluations:

- 1) Relative or Friend:** Call someone you trust with your healthcare information who has a computer, iPhone or tablet and they can ask you the questions over the phone and submit the evaluation on your behalf.
- 2) Public Library:** Nearly all public libraries have computers and staff available to help you complete your evaluation. If you need help finding a library in your area, give the help desk a call!

This evaluation must be completed before your next doctor's visit or you may be required to reschedule your appointment.

If you have any questions about this program or have technical difficulties completing your evaluation, please call the Help Desk at 251-308-4087
